EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Daniel Nichols (reg. no. 29,420) on 4/8/2005.

The application has been amended as follows:

In Claim:

Claim 11 has been amended as follows:

11. (amended) - - A digital camera comprising: an image sensor comprising an array of sensor cells; and a Channel processing circuit coupled to receive channel output data from the image sensor, wherein in use the Channel processing circuit selects a window in the channel data, the window having a reference pixel value and a plurality of nearby pixel values, said reference pixel value originating from a reference cell that is one of the sensor cells and said nearby pixel values originating from said sensor cells that are in close proximity to said reference cell; and thereafter assigns a dynamic range compression value to a selected pixel location comprising part of an image, wherein the Channel processing circuit determines the dynamic range compression value by determined from the steps of: multiplying said pixel values in the window by a respective weight value to provide weighted pixel values; adding said weighted
